Summary

2026 M.Sc. Computer Science graduate with experience building Python/C++ machine learning systems, LLM-enabled automation workflows, NLP-related backend services, and rigorous model evaluation pipelines. Strong fit for new-grad ML engineering through hands-on PyTorch experimentation, generative AI workflows, data pipeline engineering, evaluation design, debugging, and clear technical communication.

Education

M.Sc. in Computer Science <i>University of Calgary</i>	GPA: 3.94/4.0	Sep 2022 – Feb 2026 <i>Calgary, Canada</i>
B.Sc. in Computer Engineering <i>Sharif University of Technology</i>	GPA: 3.69/4.0	Sep 2016 – Feb 2021 <i>Tehran, Iran</i>

Technical Skills

Programming: Python, C++, JavaScript, SQL

ML / AI: PyTorch, Scikit-learn, TensorFlow, CNNs, LLM workflows, AI agents, prompt design, model evaluation

Data / Experimentation: NumPy, Pandas, SciPy, feature engineering, offline evaluation, statistical analysis, data pipelines

Backend / Product Engineering: Django, Node.js, REST APIs, PostgreSQL, authentication, Docker, Git, Linux, AWS

Automation / Tools: n8n, OpenClaw, SearXNG, Telegram API, Streamlit, Google Earth Engine API, GDAL, Rasterio

Work Experience

Research Software Developer <i>BigGeo / Mitacs, University of Calgary</i>	Sep 2022 – Feb 2026 <i>Calgary, Canada</i>
---	---

- Built C++/Python software for scalable processing, storage, retrieval, and evaluation of large scientific datasets.
- Automated data-ingestion and preprocessing workflows using GDAL, Rasterio, SNAP, and satellite data APIs.
- Developed encoding pipelines to convert complex domain data into structured tensor files for downstream analysis.
- Improved encoding performance with C++ multithreading, reducing 10-tensor processing from 233s to 26s.
- Documented experimental assumptions, data models, and evaluation results for research and stakeholder communication.

Back-End Developer <i>Asr Gooyesh Pardaz</i>	Jun 2020 – Jul 2022 <i>Tehran, Iran</i>
--	--

- Developed Django REST APIs for NLP, text-to-speech, and speech-to-text service plans backed by PostgreSQL.
- Built authentication features including registration, Google login, password reset, and email/phone verification.
- Implemented backend logic for payment-service integration and storing plan/payment records in a relational database.
- Contributed to a WebRTC-based chatbot system using GPT-style responses and FAQ data to answer client questions.

Deep Learning Teaching Assistant <i>Neuromatch Academy</i>	Jul 2026 <i>Remote, United States</i>
--	--

- Mentored an international pod of ~15 students through Neuromatch Academy's intensive three-week Deep Learning course.
- Facilitated hands-on PyTorch tutorials spanning MLPs, CNNs, attention/transformers, diffusion generative models, and reinforcement learning.
- Guided project groups through end-to-end deep learning research projects, from question formulation and literature review to model implementation and final presentations.

Teaching Assistant <i>Department of Computer Science, University of Calgary</i>	Dec 2022 – Apr 2025 <i>Calgary, Canada</i>
---	---

- **Developing Big Data Applications:** Mentored +25 students on AWS-based data pipelines, cloud storage, debugging, and scalable data workflows.
- **Working with Data at Scale:** Supported +20 students with large-scale data processing, data pipelines, and high-volume data analysis.
- **Database Management Systems:** Assisted +75 students with SQL, database design, course projects, grading, and exam support.

Research and Technical Projects

Agentic Job Search Automation Platform <i>OpenClaw, n8n, LLMs, AI Agents, Docker, Workflow Automation, SearXNG, Telegram API</i>	May 2026 – Present
--	--------------------

- Building an agentic AI system to search jobs, analyze job fit, and generate tailored application materials.
- Designed LLM-based workflows for resume/job matching, skill-gap analysis, application decision support, and structured

output generation.

- Integrated Google Sheets, Google Drive, and Telegram API to track jobs and send automated application alerts.
- Prototyped the initial workflow in n8n before migrating toward a more flexible OpenClaw-based agent system.

DEM Super-Resolution Framework

May 2024 – Feb 2026

Python, PyTorch, CNNs, Scientific Imaging, Google Earth Engine API, Polyscope, Data Processing and Visualization

- Trained deep ResNet models for 4× DEM super-resolution, reconstructing 30m elevation data from 120m inputs.
- Built a Streamlit pipeline using Rasterio to parallelize GEE DEM tile downloads and systematically collect and preprocess mountainous terrain data worldwide.
- Implemented PyTorch training and evaluation workflows with terrain-aware metrics such as RMSE, slope, TRI, TPI, and wavelet-based errors.
- Used geographically separated validation to reduce spatial data leakage and produce more trustworthy model results.

Spatiotemporal Earth Observation Data System Using DGGS

Sep 2022 – Feb 2026

First-author publication | M.Sc. thesis | C++, Python, DGGS, Wavelets, B-splines, Time-Series

- Designed a DGGS-based framework for real-time multiresolution management of satellite imagery.
- Developed a tensor-based storage model for direct access to arbitrary regions at multiple resolutions.
- Implemented retrieval workflows for structured spatiotemporal datasets and evaluated query behavior.
- Retrieved 105,489 DGGS cells per time-series query in 13.9s, compared with about 220s using global retrieval.

Persian Text Normalizer for NLP

Oct 2016 – Feb 2021

Python, NLP, Text Processing

- Developed a Python-based text normalization toolkit to standardize Persian text for downstream NLP pipelines.
- Implemented preprocessing rules for cleaning, formatting, and preparing Persian text data for language-processing tasks.

Publication

Amir Mirzai Golpayegani, Mahmudul Hasan, Faramarz F. Samavati. *Real-Time Multiresolution Management of Spatiotemporal Earth Observation Data Using DGGS*. Remote Sensing, 2025. [doi:10.3390/rs17040570](https://doi.org/10.3390/rs17040570)

Certificates

Supervised Machine Learning: Regression and Classification,

DeepLearning.AI and Stanford University, Coursera

Oct 2024

Applied Machine Learning in Python,

University of Michigan, Coursera

Jul 2020

Languages

English: Full Professional Proficiency (TOEFL 115/120)

Persian: Native Proficiency

Achievement

Teaching Assistant Excellence Laureate

2024/2025

Department of Computer Science, University of Calgary — awarded for outstanding teaching support ([link](#))

Ranked 17th Nationwide in Iran University Entrance Exam (Konkour)

May 2016
